Table of Contents

Esri resources for your organization

Course introduction

- Course introduction
- Course goals
- Installing the course data
- Icons used in this workbook
- Understanding the ArcGIS platform

1 Rasters

- Lesson introduction
- What is remote sensing?
- Rasters in ArcGIS Pro
- Raster resolutions
- The electromagnetic spectrum
- Band combinations: Applied
- Exercise 1: Explore band combinations
 - Create a course project
 - Examine your raster
 - Modify band combinations
 - Compare band combinations
 - Display with indices
- Lesson review
- Answers to Lesson 1 questions

2 Raster functions

- Lesson introduction
- What are raster functions?
- Benefits of raster functions
- Consider raster function parameters
- Types of raster functions
- Exercise 2: Explore raster functions
 - Examine a raster
 - Apply the Greater Than function
 - Apply the Slope function
 - Apply the Aspect function
- Lesson review

Answers to Lesson 2 questions

3 Raster function templates

Lesson introduction

What are raster function templates?

Raster function template components

Evaluate a raster function template

Exercise 3: Create a raster function template

- Create the raster function template

- Build the function chain: Elevation range

- Build the function chain: Slope range

- Build the function chain: Aspect range

- Combine all the functions

- Save the raster function template

- Apply the function template

- Modify the raster function template

- Apply the raster function template

Benefits of using raster function templates

Raster functions used in raster products

Lesson review

Answers to Lesson 3 questions

4 Change detection with raster functions

Lesson introduction

Types of change detection

Choosing types of change detection

Magnitude change detection workflow

Preprocessing methods for change detection

Exercise 4: Measure change detection with raster functions

- Evaluate rasters

- Preprocess input rasters

- Use an index on an input raster

- Calculate change

- Identify meaningful change

- Create an analysis product

Lesson review

Answers to Lesson 4 questions

5 Image classification techniques

Lesson introduction

Defining image classification

- Describing image classification outputs
- Image classification types
- Image classification methods
- Choosing image classification techniques
- Lesson review
- Answers to Lesson 5 questions

6 Classification workflows

- Lesson introduction
- Unsupervised image classification workflow
- Exercise 6: Use the unsupervised image classification workflow
 - Add input data
 - Prepare the surface model data
 - Prepare the multispectral raster
 - Train the image classifier
 - Classify the raster
 - Create the initial analysis product
 - Evaluate in 3D
 - Challenge: Survey the tree canopy
- Supervised classification workflow
- Classifying a raster with the Image Classification Wizard
- Lesson review
- Answers to Lesson 6 questions
- Exercise 6 challenge solution

7 Segmentation

- Lesson introduction
- What is segmentation?
- Segmentation parameters
- Segmentation parameter exploration
- Exercise 7: Create a segmented raster
 - Add the input raster
 - Create initial segmentation
 - Improve segmentation results
 - Create the segmented raster
- Lesson review

8 Training the classifier

- Lesson introduction
- Training sample considerations

Exercise 8A: Create training samples

- Add input data

- Evaluate the study area

- Configure the Training Samples Manager

- Collect training samples

- Save training samples

Types of image classification algorithms

Exercise 8B: Create a classified thematic raster

- Create a classifier definition

- Create a classified thematic raster

- Extract a target class

- Challenge: Calculate the percent per parcel

Lesson review

Answers to Lesson 8 questions

Exercise 8B challenge solution

9 Classification evaluation

Lesson introduction

Pixel Editor functionality

Pixel Editor operations

Post-processing classification results

Accuracy assessment workflow

Accuracy assessment statistics

Exercise 9: Create an accuracy assessment of classified results

- Evaluate input layers

- Reclassify pixels

- Add accuracy assessment points

- Complete the confusion matrix

Lesson review

Answers to Lesson 9 questions

Appendices

Appendix A: Esri data license agreement

Appendix B: Answers to lesson review questions

Appendix C: Additional resources
